Good to Know

Firm pricing is confirmed at consultation and depends on surface area, treatment time, and the level of sun damage, aging, fine lines, and pigmentary or textural concerns.

Save 25–30% as an Add-On

When Aurera is performed at the time of Junera® or a surgical procedure, treatment pricing is reduced by approximately 25–30%.

BEYOND RESURFACING

Aurera also treats scars, acne, and stretch marks, and can support skin tightening and hair growth. Because these concerns vary in scope and severity, they are quoted case by case following an in-person or virtual/photographic exam.
